## Airway Management in Times of Crisis – The AMF Approach (AMTOC)

5<sup>th</sup> September 2026  
Holiday Inn, Mayur Vihar, Delhi

Every airway manager aims for crisis free airway management through good assessment, good airway skills and good optimization strategies. Although this reduces problems, it cannot eliminate airway crises altogether.

This workshop will provide hands-on opportunity to the participants to identify the gravity of airway crises, learn the general principles during airway crises and management of airway crises of various severity. The elaborate platter will offer the complete range, from the often dreaded but mostly benign can't intubate; to the rare but life-threatening can't oxygenate situations and the means, mindset and teamwork to deal with these calmly and effectively.

### Highlights:

#### Crises-proof approach to airway management

- Situation - 1 - Relaxant given; can't intubate
- Situation - 2 - Can't intubate; can't mask ventilate
- Situation - 3 - Can't intubate; can't mask ventilate; can't place SAD
- Situation - 4 - Can't intubate; can't mask ventilate; can't place SAD; can't oxygenate either
